

HOW TO SURVIVE

You are in a small life raft in the middle of the ocean, after a shipwreck. You have 12 items in the life raft with you. However, the raft is too heavy and is sinking. You must reduce the weight of the life raft quickly in order to stay afloat long enough to be rescued. Oh, and by the way you are floating in shark-infested waters.

You can only keep 5 items. Each group must decide as a group what items to keep and which ones to toss overboard.
